

MODEL
587-

A **PACCAR** COMPANY

FUELED BY INNOVATION

When Peterbilt decided to improve on what was already one of the most successful, fuel efficient trucks on the road, it relied on two resources. One was the people who know trucks best – operators and fleet managers. The other was pure Peterbilt innovation and engineering excellence.

The result: the groundbreaking, Peterbilt Model 587. The Model 587 is SmartWay® certified by the EPA as fuel efficient and environmentally friendly, and sets the new standard of operational efficiency as well as driver comfort and safety for on-highway trucks.

The Model 587 is innovatively designed for long-haul fleets, driving teams or owner-operators who demand uncompromising quality, maximum aerodynamic performance, superior fuel efficiency and the highest overall value.

Fuel Efficiency

A new front-end design smoothly diverts air over and around the streamlined hood and molded bumper. Aerodynamic improvements have been validated through extensive wind tunnel and computational fluid dynamics testing, resulting in a 1.25% fuel efficiency gain.

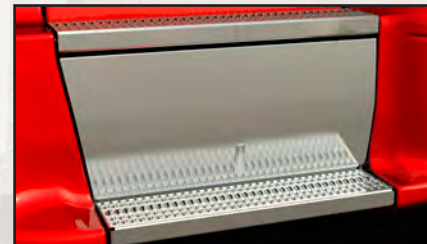

Maneuverability

The Model 587 features a newly designed steering geometry that provides an impressive curb-to-curb maneuverability improvement of 12%.

Visibility

The innovative new forward lighting system significantly improves visibility, including more consistent light distribution and better overall road coverage and down-road visibility. Standard halogen lights feature a 35% increase in brightness while optional high-intensity discharge lights provide a 220% increase.

Safety Improvements

A new robust gas spring design allows for easier opening and closing of the battery/tool box and helps ensure items are stored safely and securely.

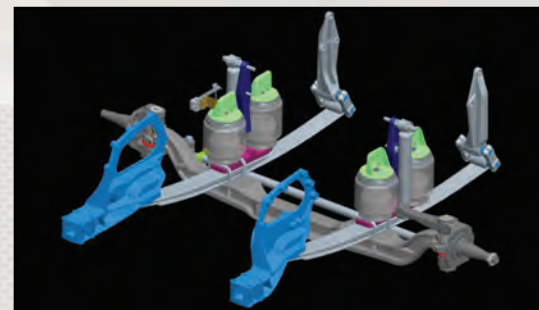

UNPARALLELED VALUE

The Model 587 interior features an integrated cab and sleeper that matches luxury with efficiency and productivity. The spacious and ergonomic cab interior provides plenty of legroom, swivel seats, dual arm rests and easy access to switches and power controls for added comfort and convenience. It includes a full 30-inches of walk-through space between the seats, offering easy access to a sleeper that surrounds the driver with functional amenities and accessible storage space such as cabinet enclosed closets and under-bunk storage.

The PACCAR MX engine brings a new level of innovation through industry-leading quality, exceptional reliability and proven performance. The MX is available with a wide range of horsepower and torque options to deliver maximum performance, achieves superior fuel efficiency and offers excellent horsepower-to-weight ratios to optimize payload. The MX engine's fully integrated systems result in longer service intervals, increased uptime, lower operating costs and higher resale value.

The Premium interior features the revolutionary new SmartNav™ system, an in-dash, telematics and in-entertainment system. SmartNav™ features a 7-inch touch screen that provides real-time vehicle monitoring, a truck-specific Garmin navigation system, hands-free Bluetooth connectivity, voice recognition, a fully integrated audio system with satellite radio as well as MP3, USB and iPod capabilities.

Peterbilt's proprietary Front Air Leaf Suspension is lightweight and features a 20% improvement in ride quality over taper leaf suspensions for an extremely soft ride and is compatible with air disc brakes as well as reduces tire wear. The Front Air Leaf Suspension's ride height is designed to match the popular Low Air Leaf and FlexAir rear suspensions.

Dealer Support

With more than 250 dealer locations in the United States and Canada, Peterbilt's extensive dealer network means you or your driver is never far from Peterbilt parts, service and sales expertise.

Peterbilt.com

The latest news, events, product information, parts and service information and merchandise are all just a click away. You can also follow Peterbilt on twitter for up-to-the-minute Peterbilt updates.

TruckCare® Services

This 24/7 customer support program means emergency roadside assistance is just a phone call away at (800) 4-Peterbilt. Also available through the TruckCare program are preventive maintenance agreements, service scheduling options and TruckCare Plus cards, which feature ATM access as well as a variety of custom cost management solutions.

PACCAR Financial

Merging an understanding of the trucking industry with an always competitive rate package, PACCAR Financial provides the financing and insurance tools that are key to the success of any trucking operation. PACCAR Financial will work with your Peterbilt dealer to customize a financing package that suits your needs.

PacLease

This full-service leasing program offers those who prefer to lease their equipment the opportunity to focus on their core business, while leaving many fleet management details to experts. Contract maintenance, logistics services, insurance and fuel tax reporting are just a few of the support services available to PacLease customers. Contact your local PacLease office or call (800) 426-1420 for more information.

PACCAR Parts

The right part for your Peterbilt truck is always in stock thanks to the TruckCare Connect program. The PACCAR Parts online inventory management system and electronic cataloging help ensure instant accessibility of the right part for your needs.

Red Oval

Only high-quality, carefully inspected pre-owned trucks are available through Peterbilt's Red Oval® Certified Pre-Owned Truck Program. Looking for a specific year, make and model? The Truck Locator System will scour the dealer network for a truck that matches your needs.
